STATIONARY EQUIPMENT

FROM

METAL CAPTURE DOWNDRAFT TABLE

- Ideal for capturing aluminum and titanium dust.
- Can be used with Vacuum and Non-Vacuum Tools.
- Working area of 36" wide x 60" long accommodates large work pieces.
- Includes casters for easy maneuvering; casters also lock securely into place.
- Multi-positional exhaust directs air up, down or horizontally.
- Overload protection / fused disconnect for safety.
- Sturdy 12-gauge construction.
- Includes shields for both sides and back of table.
- Work piece capacity / load rating of 2,000 pounds.
- 42 gallon capacity; 1,800 CFM at 4" static pressure.
- Easy system maintenance. No paper filters to replace!
